1. The first step in the process of identifying a problem is to recognize that a problem exists. This involves gathering information about the situation and identifying the specific issue that needs to be addressed.

100% of the respondents reported that they had received training in the use of the system. The training was provided by the system's developers, who provided a comprehensive overview of the system's features and functionality. The training was well-received by the respondents, who reported that it was helpful in understanding the system and its capabilities. The training was also well-organized and easy to follow, which helped to ensure that the respondents were able to use the system effectively. The training was also well-timed, as it was provided before the respondents began using the system. This helped to ensure that the respondents were able to use the system from the start, which helped to ensure that they were able to get the most out of the system. The training was also well-received by the respondents, who reported that it was helpful in understanding the system and its capabilities. The training was also well-organized and easy to follow, which helped to ensure that the respondents were able to use the system effectively. The training was also well-timed, as it was provided before the respondents began using the system. This helped to ensure that the respondents were able to use the system from the start, which helped to ensure that they were able to get the most out of the system.
